Comments From the Doctor's Office

Ms Cartrette,

I have reviewed your recent lab results. Your blood counts, kidney function and liver function are all within normal ranges.

The testing we did looking for antibodies specific for conditions like lupus, scleroderma, Sjogren's syndrome, inflammatory muscle diseases were all normal. The test that can be seen associated with psoriatic arthritis was also normal, but this does not completely rule out this condition.

Your screening test for tuberculosis and hepatitis were both negative.

The marker of inflammation that we checked was also improved.

If you would like to move forward with the pharmacy looking into coverage options for Humira, please let me know and we can start that process.

QuantiFERON-TB Gold Plus Blood (Lab ID/Accession # 776052998L) (Order 776053126)

Narrative

Performed at: 01 - LabCorp Burlington
1447 York Court, Burlington, NC 272153361
Lab Director: Sanjai Nagendra MD, Phone: 8007624344

Result Report

QuantiFERON Criteria:	Comment
	The QuantiFERON-TB Gold Plus result is determined by subtracting

the Nil value from either TB antigen (Ag) tube. The mitogen tube serves as a control for the test.

QuantiFERON TB1 Ag Value: 0.09 IU/mL
QuantiFERON TB2 Ag Value: 0.09 IU/mL
QuantiFERON-TB Gold Plus: Negative (Range: Negative)
Quantiferon Incubation: Incubation performed.
Quantiferon Mitogen Value: >10.00 IU/mL
Quantiferon Nil Value: 0.13 IU/mL
