### Comments From the Doctor's Office

---

I have reviewed your recent lab results.

Your blood counts, kidney function and liver function are all within normal ranges.

The testing we did looking for antibodies and markers assessed with conditions like systemic lupus erythematosus, rheumatoid arthritis, Sjogren's syndrome, scleroderma, inflammatory muscle diseases, psoriatic arthritis all came back normal. Both markers of inflammation were within normal ranges.

Because of these normal lab results, starting a stronger immune suppressing medication would not be recommended. We could consider starting a medication such as hydroxychloroquine to monitor your response. This is a medication that is not an immune suppressing medication, but is a medication that can take a number of months to build up in your system and take effect. You can read more about medications website below.

<https://www.rheumatology.org/Portals/0/Files/Hydroxychloroquine-Plaquenil-Fact-Sheet.pdf>

Please let me know if you have any questions about this medication, or if you feel comfortable with me sending a prescription to your local pharmacy.

QuantiFERON-TB Gold Plus Blood (Lab ID/Accession # 05914178440) (Order 989399808)

QuantiFERON-TB Gold Plus Blood (Lab ID/Accession # 989399643L) (Order 989399808)

### Narrative

---

Performed at: 01 - Labcorp Burlington

1447 York Court, Burlington, NC 272153361

Lab Director: Sanjai Nagendra MD, Phone: 8007624344

### Result Report

---

QuantiFERON Criteria:

Comment

The QuantiFERON-TB Gold Plus result is determined by subtracting

the Nil value from either TB antigen (Ag) tube. The mitogen tube serves as a control for the test.

**QuantiFERON TB1 Ag Value:**

0.06 IU/mL

**QuantiFERON TB2 Ag Value:**

0.06 IU/mL

**QuantiFERON-TB Gold Plus:**

Negative (Range: Negative)

Chemiluminescence immunoassay methodology

**Quantiferon Incubation:**

Incubation performed.

**Quantiferon Mitogen Value:**

>10.00 IU/mL

**Quantiferon Nil Value:**

0.07 IU/mL
