Lab tests - Blood (Venous)

William Baker, MD 06/22/2023, 3:06 PM

Ms. Cartrette,

I just wanted to reach out regarding your lab testing.

Overall, I think your lab testing is quite reassuring. Cell counts, electrolytes, kidney function, and liver function was entirely normal.

You had a very minimal, nonspecific elevation of your sedimentation rate (a marker of inflammation) while your C-reactive protein (another marker of inflammation) was normal. This is of unclear clinical significance currently.

Additional screening for underlying infections was entirely negative.

Updated x-ray testing has been ordered of the hands/wrists in addition to the SI joints and lumbar spine. We can complete these at your convenience. I look forward to discussing this in greater detail with you at our follow-up appointment

Results

Hemoglobin

Normal range: 10.8 - 15.5 g/dL

13.3

**Hematocrit**

Normal range: 34 - 46 %

40

**Mean Corpuscular Volume (MCV)**

Normal range: 80 - 100 fL

97

**Mean Corpuscular Hemoglobin (MCH)**

Normal range: 26 - 34 pg

32

**Mean Corpuscular Hemoglobin Conc (MCHC)**

Normal range: 32 - 35 g/dL

33

**Red Cell Distribution Width (RDW)**

Normal range: 12.2 - 16.6 %

13.8

**Platelet Count (PLT)**Normal range: 153 - 400 $10^3/\mu\text{L}$

243

**Mean Platelet Volume (MPV)**

Normal range: 7.3 - 11.2 fL
